

Oil Reserves of Libya Past, Present and Future

Report

Prepared by Nubian Consulting

*Oak Court, Wiveliscombe,
Taunton, Somerset, TA4 2PA UK*

2008

Revision 1 - March 2009

CONFIDENTIAL

Oil Reserves of Libya – Past, Present and Future

A non-exclusive report prepared by

Nubian Consulting

Authors: Dr D Hallett and Dr D D Clark-Lowes

June 2008

Revision 1 - March 2009

CONTENTS

Executive summary	Page
1 Introduction	1
1.1 Objectives	1
1.2 Authors	2
1.3 Database	3
1.4 Background	4
1.5 Format and content of report	7
1.6 Methodology	9
1.7 The role of the Libyan National Oil Corporation (NOC)	10
1.8 Note on transliteration of Arabic names as used in the text, atlas and montages of this report	13
2 Petroleum Systems	17
2.1 Introduction	17
2.2 Petroleum systems of the Zallah Trough	39
2.3 Petroleum systems of the Kotlah / Abu Tumayam Trough	44
2.4 Petroleum systems of the Zahrah Hufrah Platform	47
2.5 Petroleum systems of the Bayda Platform	50
2.6 Petroleum systems of the Maradah Trough	55
2.7 Petroleum systems of the Zaltan / Jahamah Platform	57
2.8 Petroleum systems of the Ajdabiya / Intisar Trough	59
2.9 Petroleum systems of the Amal Platform	59
2.10 Petroleum systems of the Maragh Trough	61
2.11 Petroleum systems of the Eastern Embayment (Nubian Sandstone Province)	63
2.12 Petroleum systems of the Murzuq Basin	65
2.13 Petroleum systems of the Ghadamis Basin	67
2.14 Petroleum systems of the North West Offshore	72
2.15 Petroleum systems of the North East Offshore	74
2.16 Conclusions	76
3 Statistical Review	79
3.1 Overview of exploration effort	79
Discoveries and success rate	82
Giant fields	86
Oil Production	88

Reserves by basin	92
Reserves by province	94
Reserves by age	98
Reserves by formation	99
Reserves by petroleum system	100
Reserves by field size	104
Reserves by date of discovery	105
Reserves by original operator	108
Reserves by current operator	110
Reserves by original concession	112
Reserves by current concession	113
Reserves controlled by NOC and state companies	115
 3. 2 Review of past Libyan oil reserves	 117
Past reserves as reported by NOC	117
Past reserves as reported by Campbell	120
Past original recoverable reserves – this study	121
Past remaining reserves – this study	122
Depletion of reserves and reserves replacement	123
Impact of oil price	124
 3. 3 Review of present Libyan oil reserves	 126
Definition	126
Range – maximum, most likely, minimum	127
Types of reserves	127
Remaining reserves in currently producing fields	127
Recoverable reserves in undeveloped pools on producing fields	128
Recoverable reserves in undeveloped discoveries	129
Reserves attributable to EOR on currently producing fields	129
Total present recoverable reserves – this study	130
Reserves to production ratio	131
Variation between different estimates	132
Small pools and potential for cluster developments	133
Undeveloped pools held by NOC	134
 3. 4 Review of future Libyan oil reserves	 135
Methodology	135
Creaming curves, parabolic fractals and drilling density	137
Regions of Libya currently without oil discoveries – Kufrah, Cyrenaica, ‘other offshore’	149
Published estimates of Libyan yet to find	155
Summary of Libyan future reserves	158
 3. 5 Summary	 159

4	Enhanced Oil Production	161
4.1	Introduction	161
4.2	Definitions and methodology	162
4.3	Existing and planned EOR projects	164
4.4	Results	171
4.5	Conclusions	172
5	Infrastructure and Pipelines	173
5.1	Introduction	173
5.2	History of the terminals and their pipelines	176
5.3	Capacity constraints	186
5.4	Rehabilitation opportunities	186
5.5	Conclusions	186
6	Conclusions	189
6.1	Conclusions from the statistical analysis	189
6.2	Libyan oil reserves and total endowment – this study	193
6.3	Exploration opportunities for IOCs in Libya	194
6.4	Development opportunities for IOCs in Libya	196
6.5	Opportunities for service companies in Libya	201
6.6	Speculations on the future of the Libyan oil industry	202
7	Bibliography	203

Figures and Enclosures

Text figures and

Enclosure 1

Pipelines Map of Libya

Enclosure 2

Pipelines Map of Sirt Basin
